**AKIJ BOARD**  
NOW YOU CAN

# NOW YOU CAN

We inspire your imagination, prioritizing your freedom to express your creativity. Our core philosophy revolves around empowering you to unleash your full potential.

Leading the trend, modern glossy surface panels and brilliantly designed components aspire to become stunning interiors and furniture.

To add that depth of elegance and style to your spaces, Akij Board brings high gloss boards. These high gloss offerings preserve the first day appearance for many years due to their high resistance to fading and are easy to clean without losing the gloss or color. Technically, a high gloss UV panel is a glossy decorative surface produced by applying thermal setting UV technology to the surface of HMR and Standard MDF Boards.

Akij Board, a brand under Akij Particle Board Limited (APBML) from the esteemed AkijBashir Group emerged as the leading board manufacturer in Bangladesh in 2001. This Board brings together innovative concepts and creative ideas by incorporating a wide range of products. This approach exemplifies AkijBashir's vision of embracing the future while staying grounded in the present.
